

THEORY of CHANGE

Owini – Water For All

What is the problem we are trying to solve?

Insufficient access to quality water in rural communities

What do we invest into the project?

What are we doing to bring about change?

What will change in the short term?

What are the wider benefits we work to achieve?

What is our purpose / long term change?

Inputs

Design and engineering
Supply of materials and equipment
Construction methodology
Locally hired and trained workforce
Logistics services

Activities

Construction of water infrastructure
Operation and maintenance to ensure sustainability of infrastructure
Training of operators for operation and maintenance
Community engagement activities

Outputs

Water infrastructure in operation
Empowered population and operators for self sustained operations
Greater availability of quality water

Outcomes

Safer experience
Time reduction for fetching water
Time for other activities
Improved sense of community (public spaces)
Longevity of water infrastructure
Local government savings down the road
Improved life quality (health, hygiene)
Reduction in water-born illnesses
Cleaner homes

Impact

Promote quality of life through greater access to clean water in rural communities

Beneficiaries

Rural communities (especially women and girls)
Local Authorities

Stakeholders

Central and Local Government
Poverty reduction program
